

Please do not implement any telemarketing laws that will lessen the law already in place for Indiana. Our state legislators worked diligently to pass our current law, our attorney general has been very successful in enforcing this law, & Indiana is very satisfied with the results! I used to receive 3-4 telemarketing calls DAILY. Now I do not receive any telemarketing calls. How pleasant it is to know that when my telephone does ring, it is someone I really want to talk to, not someone conducting their business over MY phone line that I pay for. Indiana was proactive and has passed a workable law for its citizens to enjoy. Please do not undo a good thing just so a few may benefit from a "pay off".
